- Classically trained pianist for 10 years

- Team player & Leader; Works well with others and knows when to take initiative.

- Responsible and organized

PROJECTS

Mission Stork Game — A visual basic programmed game made with self-created pixel graphics. A stork is sent on a mission to deliver a special package and must overcome 3 different obstacle-filled levels to win and deliver the package.

Personal Website — Built a Personal Website from the bottom up using HTML and CSS. Includes my resume, projects and an about me page.

Music Tuner Skill — On Amazon Alexa, I am in the process of creating a skill that helps beginner musicians tune their instruments. Will have functionalities like multiple note playing and audio feedback telling the user whether their string is out of tune.

Smiles & Motivation — My current project with the goal to become a motivational and de-stressing platform. Recommends music, quotes & advice based on mood and personality.
